Project Objective

The main aim of this project is to enhance the animal healthcare by providing an online system for all Pet owner where they can register for their pets using preferred hospital network and health camp.

Our system can provide the followings enhanced features :

- Online PET registration
- Health camp can register for Hospitals and Drivers
- Drivers can drop Pet to the hospital
- Hospital Admin can assign Vet
- Vet can assign a Pet to a Lab
- Lab can send health status of the pet to the Health Admin
- Adding Fund Raiser and Sponsor

BLOCK DIAGRAM OF SYSTEM DETAIL

ENTERPRISES AND ORGANIZATIONS DETAILS

Enterprises

- Hospital
- Health camp
- Fundraiser
- Logistics

Organizations

- Vet System
- Pet Volunteer system
- Hospital
- Health camp

USER INTERFACE FOR FUNDRAISER

FUTURE SCOPE

- Sending email notifications from the system
- Adding google map for the drivers
- Enhancing the Hospital network

CONCLUSION

- Larger network of hospitals can be integrated within the system which increase the medical facilities provided to the Pets.

- Through this online platform, pet volunteers who are in need of funds can connect to the sponsors.

- Various health campaign can be organized regularly to keep a track of the Pet health.
